

# **MOBILITY**

**CONTROLLERS FOR ESCALATORS  
AND MOVING WALKWAYS**

# Modern engineering equipment for maximum comfort

The control panel can be designed to your technical specifications for the **modernization of escalators and moving walkways.**

The system is equipped with a **SIL3 certified board**: designed by our technicians to guarantee the highest performance, verify the presence of the steps and control the sliding speed of the handrail.

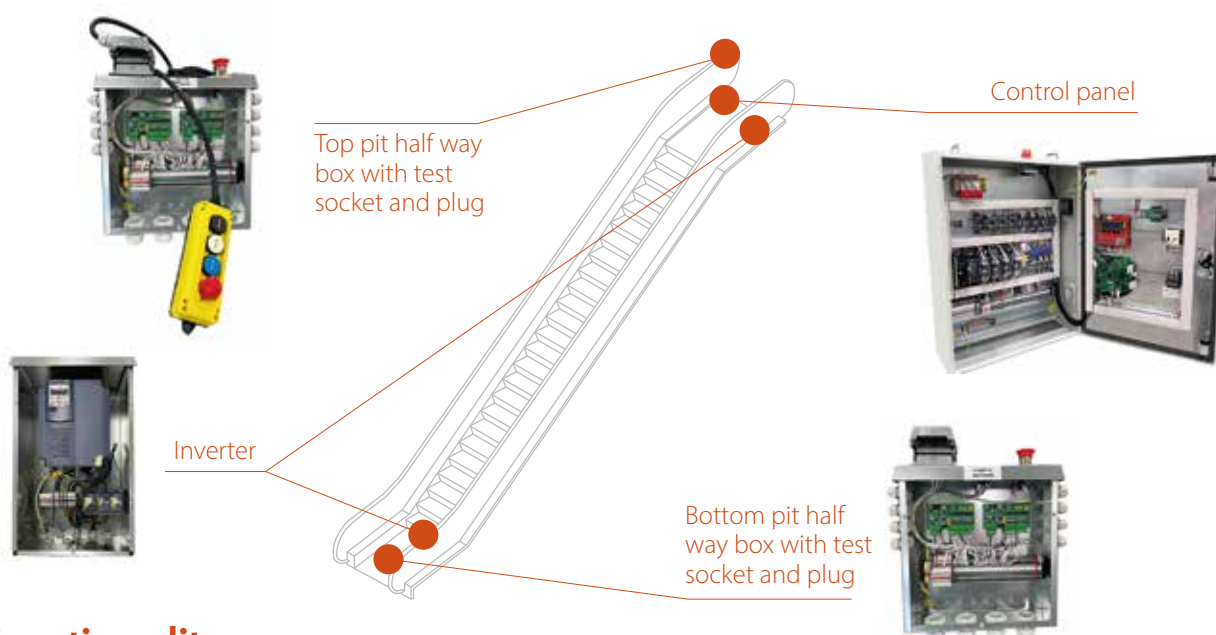

Energy saving

Management mode

Remote control

## Functionality

Control of the presence of steps and speed of the handrail with **SIL3 certified board**

Motor control management via **optimized inverter**

Fault diagnostics with serial communication

Three-phase power supply

Management of programmable operating modes: **Continuous** | **Stand-By** | **Start&Stop**

Regenerative module *(optional)*

Wiring with halogen free cable *(optional)*

IP55 cabinet *(optional)*

Programmed and pre-wired directional displays *(optional)*

**KM0+: our monitoring SOFTWARE for all your needs**
